Re: Change in Standard Finish of FG 78 Steel Ceiling Plate

Effective immediately TOLCO will no longer offer the FG 78 Steel Ceiling Plate in a plain finish material. Going forward, the standard material and finish on all FG 78 Steel Ceiling Plates will be pre-galvanized steel. However, this conversion to pre-galvanized steel will take place as a rolling change. Therefore, during this transitional phase all current inventories of plain finish material will be converted to an electro-galvanized finish until stock is depleted at which time we will permanently offer only the pre-galvanized version.

All orders currently waiting to be shipped will be automatically converted to the electro-galvanized finish and plain finish pricing will be honored.

If you should have any questions about this or any other TOLCO products please feel free to call our technical services or customer service departments.

Sincerely,

Greg Shaughnessy
Director – TOLCO Marketing
